# Free Consultation Worth \$350 For Buying My Program

In chapter 13 of my safety program, "Stopping Injuries in Their Tracks," I offer service options for consideration.

For \$360.00 I offer to conduct a "mock OSHA Audit." This audit is similar to the one OSHA would conduct if they came calling.

But, you can get this free and without the stress of OSHA Consultative calling by ordering my program right now.

For \$195, you can get my step-by-step guide to creating a successful safety program tailored to your company's specific needs. This is a small investment considering what you could face if OSHA found fault with your existing safety program.

If OSHA finds simple safety violations, you will not be cited and will be given about 30 days to make the necessary corrections.

Citations will be issued if OSHA comes calling because of an injury or illness, and there is no grace period for that.

It used to be that you could do some negotiating with the regulators, but not anymore. If they issue a citation, you are considered guilty, unless you can prove you're not by producing the required documentation in your defense.

I'm now offering this audit **FREE OF CHARGE**, for the next five companies that order.

Here's what you will receive:

- I will ask for similar documentation that OSHA would request from you.
- I will send you a confidentially agreement. The information will only be seen by me.
- I will evaluate and issue a written report.
- My report will identify the areas that may not be in compliance or those that need attention.
- This report will be free and without any further obligation.

Keep in mind; I have a 96% success rate in stopping frequency and severity of injuries and illness.

Stop paying thousands of extra dollars in penalty premiums and put this program to work at reducing your costs.
